

## **ECO ENERGY INDUSTRY LEADER ANNOUNCES PLANS TO EXPAND TO CAMBRIDGE**

### **Solar and Geothermal Experts Are Now Located On Thorne Street**

The Hayter Group continues to expand its presence in Southwestern Ontario with a new office in Cambridge, ON. Located on Thorne Street, the Cambridge office will offer geothermal heating and cooling along with solar products and services in this growing area.

“We had a lot of communities that we could have expanded to—probably a hundred or so-- but we see incredible growth potential in Cambridge and we want to be here,” says Chad Hayter, The Hayter Group President.

The Hayter Group, based in Alvinston, ON, is one of Ontario’s fastest growing solar and geothermal installation companies with over 3200 geothermal installs and 1.25 megawatts of mainly roof top solar P.V. (electricity producing) and solar thermal (hot water) energy accounted to date.

A free information session is scheduled for November 20th at 7 PM at the Holiday Inn in Cambridge for home and business owners interested in capitalizing on available government incentives. The current returns on investment are excellent for both residential and commercial applications on both geothermal and solar applications.

Currently, The Hayter Group has the highest number of trained geothermal technicians in the province. “...and they’re the best trained as well. The reason we have 5000 clients in Ontario right now is that we only give them the best, and that includes the technicians on each project.” Hayter explained.
